## SDP COMPACT 9mm

The new Sphinx® SDP Compact is a in Double-Action/Single-Action pistol with an ambidextrous decocking lever and magazine catch featuring six safeties.

An integrated recoil buffer improves the weapon's accuracy. The full-length guide rails are not inserts like many other pistols, but machined in, providing additional strength and increasing accuracy levels. The integrated Picatinny rail is made from MIL-STD 1913 aluminum with 4-notches to hold a variety of accessories including lights and lasers.

The lower part of the frame or grip is made from a proprietary polymer that will not break down in either extreme hot or cold environments. The ergonomic, 3-component grip is made from soft and hard material for a comfortable, confident hold. Three interchangeable grip sizes (Small, Medium, and Large) are available.
